FRIENDLY WAYS TO PRESERVE OUR EARTH

Recycle those plastic bags you get from the produce department at your local grocery store. To keep them neat and easy to find, make a dispenser out of an empty plastic half-gallon milk or juice container. Rinse the container, let it air-dry, then cut a hole in the middle. Fill the container with the plastic bags. Simply pull out a bag when needed.

You are wasting energy and money if the temperature inside your refrigerator is too cold. Besure to use a good thermometer, when checking your refrigerator's temperature. It should bearound 36–39 degrees Fahrenheit. The freezer should be 0-6 degrees Fahrenheit.

Nature's fertilizer is there for the taking. Don't burn leaves; use them to improve garden soil. Chop the leaves up with a lawn mower – they'll take up less space and decompose quicker. Make a compost pile and store your leaves there. Spade into the garden as needed.

Recycling newspapers for one year will prevent cutting down approximately 75–100 trees per year, per household receiving seven-day delivery.

If everyone in the country planted one tree a year for the next consecutive ten years, we could cut the pollution by 15%.

For good homemade window cleaner, mix together: 1 gallon warm water – 1/2 cup white vinegar – 1/2 cup ammonia – 2 tablespoons cornstarch.

To cut down air pollution from your car's exhaust, try using reformulated gasoline and oil products. Studies prove these products help cut air pollution by 17%.

To promote cleaner air when burning wood in your fireplace or wood stove, be sure the wood you use is 100% untreated, has been seasoned for at least 9 months and is not painted.

Try starting seeds in eggshell halves. It is economical and earth-friendly. Store planted shells in egg cartons, so they can easily be moved to sunny spots. When ready for transplanting, plant as is. Roots break through and the decomposed shell acts as a fertilizer.

Looking for a natural insect repellent? Try splashing a little vinegar on exposed skin. If that doesn't work, try eating garlic-filled foods, or rubbing garlic on your skin. Mosquitoes do not like the smell of garlic.

Natural fly repellent: scratch the skin of an orange. Determine where the flies are and place the orange there. The flies will leave, as they do not like the citrus oil that will be released.

Use florescent lighting in your home or apartment. You will save energy and money.

Start good habits at home. The sooner you get started, the sooner you will make a difference!

ONLY YOU

Burn Debris Disaster Free

Smokey is counting on you to follow the rules for safely burning debris.
1. Check local laws on burning.
2. Don't burn on dry windy days.
3. Clear a 30-foot circle around debris before lighting fire.
4. Keep shovel, rake and water nearby.
5. Don't leave fire unattended by an adult, even for a minute.
6. Consider alternatives to burning:
composting, recycling, or hauling to a landfill.

REMEMBER, ONLY YOU CAN PREVENT FOREST FIRES.

"AFTER YOUR INJURY FROM ANY KIND OF ACCIDENT, YOUR COMPENSATION SHOULDN'T BE THE HARDEST PART TO DEAL WITH"

If you've been injured in an accident that wasn't your fault, I know you're concerned about getting your medical bills paid . . . about whether your injuries will be fairly valued . . . about not hearing from anyone . . . and about being compensated for your pain.

Even though you may not know it, let me tell you up-front that **you have the right to be compensated for your medical expenses, lost wages, permanent injury, mental anguish, for your pain and suffering, and for the loss of quality of your life.**

But to get it, there are certain things you need to know now! That's where I come in.

Callis L. Childs

Helping You Get Fair Compensation

My name is Callis Childs. And I'm a personal injury attorney who has helped recover millions of dollars for clients just like you as fair and just compensation for injuries they've suffered because of someone else's negligence.

Without hassles and frustrations on your part. Because we deal with all the issues for you.

In fact, I'm available 24 hours per day, and, I'll come to you if you're not able to come to my office.

3 Mistakes You Should Never Make

Accident insurance almost always pays for it, but all too many people injured in an accident make at least 1 of 3 common mistakes, which later come back to haunt them. Let me briefly tell you what they are . . . and how to avoid them.

1) The most common health mistake you could regret for years: not getting treated for your injuries, even if you don't think they're serious. Without treatment you're going to be laid up longer than you need to be. And it makes any claim you file look fake if you wait.

2) Trying to take care of the injury claim yourself. The problem with your doing this yourself is that you do not know what to do to protect yourself. I can virtually promise you that if you try to handle it yourself, you'll be taken advantage of.

3) Not getting full money damages for your injuries. You may be due much more than you think, but an insurance company offer may not have your interests at heart. An attorney experienced in personal injury cases can get you more compensation in your pocket than you can get by yourself.

www.arkansas-injury-lawyer.com

We Tell Secrets: Straight Answers To Your Legal Questions

There's a lot more I could discuss with you and would like to discuss with you, but that should really be done face-to-face. So I'd like to do something special for you . . . **absolutely free of charge and without further obligation.**

Simply, I'd like to buy you an hour of my time to give you a free case review, and to show you how I'll handle all the steps in your case to get you the damages settlement you're due.

When you come in I'll show you:

- ✓**How to get doctors to treat your injuries (and get your medical bills paid);**
- ✓The process we use to get your injuries fairly valued and to get you fairly compensated for your injuries;
- ✓**The importance of starting a case immediately to ensure the highest chance of success;**
- ✓How we'll obtain all the evidence to get you full and fair money damages;
- ✓**The six things we do for people that they don't expect to be done;**

For even more information, see my web-site at **www.arkansas-injury-lawyer.com.**

5 Steps We Take To Guarantee You've Got The Right Lawyer

Equally as important as our system, is our service. Here's what you'll always get from me:

1) **Home and hospital visits,** if you're not able to come to my office.

2) **The answers you need in plain English.** In your language we explain your rights and options and tell you what we recommend.

3) **Committed to you.** Because I don't work for insurance companies I only look out for your interests. If I have to be a bare-knuckles fighter to get you fairly compensated, I'll do it.

4) **No initial fee.** Plus, after the free case review, I only get a fee if I successfully get you a settlement.

5) **We act.** When you give us the go ahead, we deliver what we promised.

"AFTER YOUR INJURY FROM ANY KIND OF ACCIDENT, YOUR COMPENSATION SHOULDN'T BE THE HARDEST PART TO DEAL WITH"

Callis L. Childs
Attorney

No amount of money can ever compensate for your injuries, but it can help make your life easier.

With the right advice and action by us, you can be sure that you'll get a fair settlement for your injuries.

As a service, I'd like to buy you an hour's worth of my time for a FREE case evaluation to learn what kind of compensation you're entitled to.

And how to get it.

At your evaluation you'll learn:

- ✓ **What precise steps to take-and when-to get you fairly compensated for your injuries;**
- ✓ How to get your medical bills paid for your injuries;
- ✓ **How to get fairly compensated for your injuries;**
- ✓ How we'll handle the entire process for you, so you don't have to go through the stress;
- ✓ **Why you must start your case as soon as possible.**

For even more information, see my website at www.arkansas-injury-lawyer.com.

Plus, you might like to know that I only get a fee if I successfully get you a settlement.

So call me now at 501-327-1700 or 888-216-7613 and let me lend you a hand, too, to recover the compensation you are fully entitled to for your injuries.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

a NEAT person

More and more of us are discovering that when neighbors communicate, it's great to use a neighborhood wireless company. With NEAT people. If you could rely on a cellular company with all the benefits of world-class wireless, but where all the people live just down the street, that'd be Neat, wouldn't it?

World-class wireless from people
just down the street. That's NEAT.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

International Symbol of Access for the Handicapped

This universal symbol tells handicapped persons–especially those using wheelchairs–that a building or facility is accessible and can be entered without fear of architectural barriers.

Wherever the symbol is displayed, the handicapped can be assured that they will not be barred by thoughtless obstacles or prohibited from participating in the mainstream of society.

International Symbol of Access for the Handicapped

This universal symbol tells handicapped persons–especially those using wheelchairs–that a building or facility is accessible and can be entered without fear of architectural barriers.

Wherever the symbol is displayed, the handicapped can be assured that they will not be barred by thoughtless obstacles or prohibited from participating in the mainstream of society.

READY.

Secretary Michael Chertoff,
U.S. Department of Homeland Security

Preparing Makes Sense. Get Ready Now.

The likelihood that you and your family will survive a house fire depends as much on having a working smoke detector and an exit strategy, as on a well-trained fire department. The same is true for surviving a terrorist attack. We must have the tools and plans in place to *make it on our own*, at least for a period of time, no matter where we are when disaster strikes. Just like having a working smoke detector, preparing for the unexpected makes sense. ***Get ready now.***

STEP ONE: MAKE AN EMERGENCY SUPPLY KIT.

Be prepared to improvise and use what you have on hand to make it on your own for *at least* three days, maybe longer. While there are many things that might make you more comfortable, think first about fresh water, food and clean air. ***Consider putting together two kits.*** In one, put everything needed to stay where you are and make it on your own. The other should be a lightweight, smaller version you can take with you if you have to get away.

You'll need a gallon of ***water*** per person per day. Include in the kits canned and dried ***foods*** that are easy to store and prepare. If you live in a cold weather climate, include ***warm clothes*** and a sleeping bag for each member of the family.

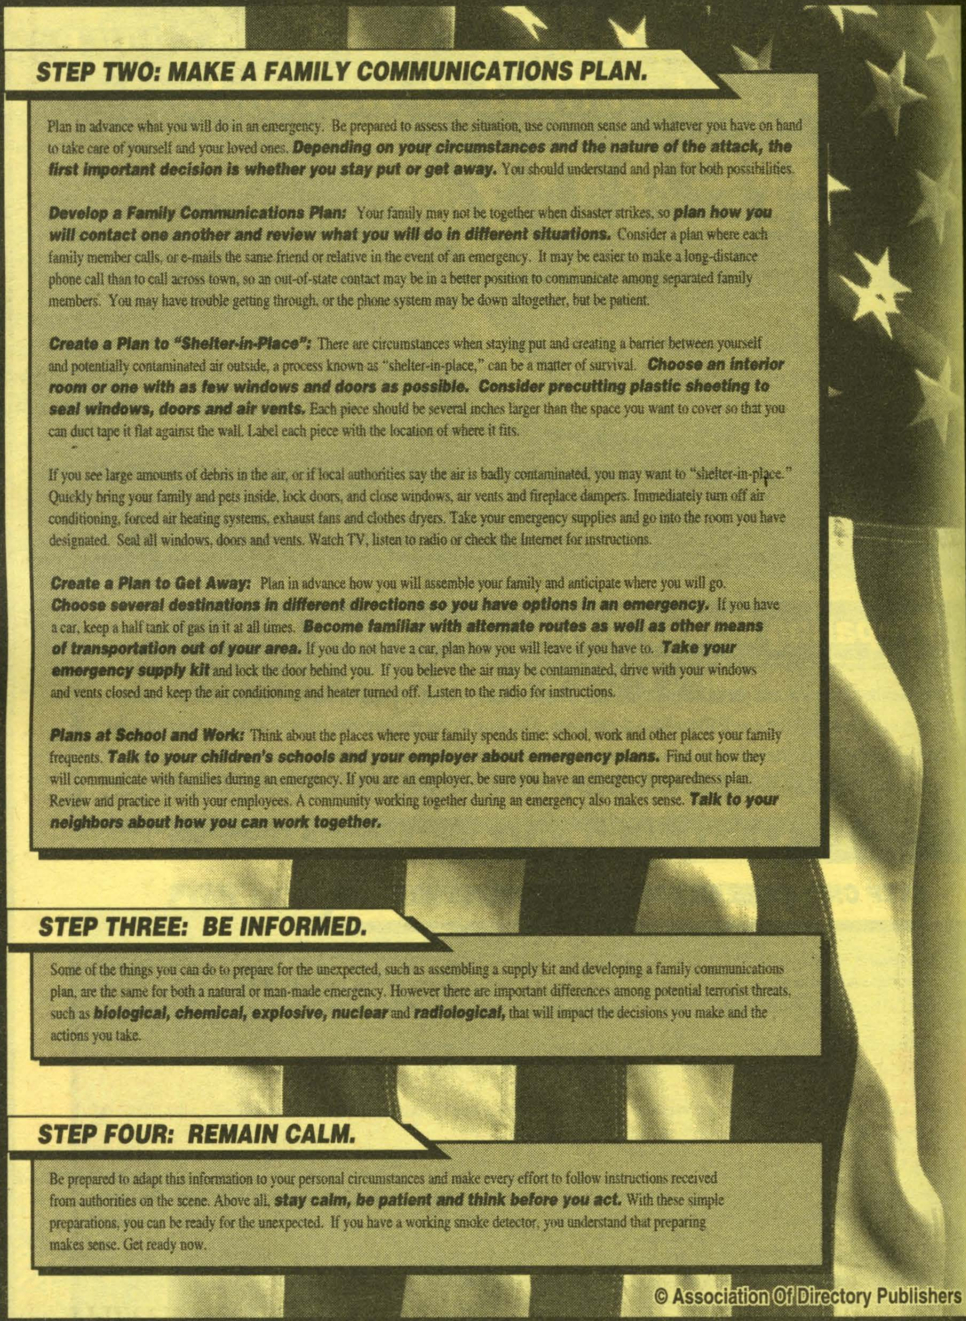
Start now by gathering basic ***emergency supplies*** and setting them aside — a flashlight, a battery-powered radio, extra batteries, a first-aid kit, toilet articles and other special things your family may need.

Many potential terrorist attacks could send tiny microscopic "junk" into the air. Many of these materials can only hurt you if they get into your body, so think about creating a barrier between yourself and any contamination. It's smart to have something for each member of the family that ***covers their mouth and nose.***

Plan to use two to three layers of a cotton t-shirt, handkerchief or towel. Or, consider ***filter masks,*** readily available in hardware stores, which are rated based on how small a particle they filter. It is very important that the mask or other material fit your face snugly so that most of the air you breathe comes through the mask, not around it. Do whatever you can to make the best fit possible for children.

Also, include ***duct tape and heavyweight garbage bags or plastic sheeting*** that can be used to seal windows and doors if you need to create a barrier between yourself and any potential contamination outside.

Call 1-800-BE-READY (1-800-237-3239) for a free brochure or go to www.ready.gov to learn about potential terrorist threats.



STEP TWO: MAKE A FAMILY COMMUNICATIONS PLAN.

Plan in advance what you will do in an emergency. Be prepared to assess the situation, use common sense and whatever you have on hand to take care of yourself and your loved ones. ***Depending on your circumstances and the nature of the attack, the first important decision is whether you stay put or get away.*** You should understand and plan for both possibilities.

Develop a Family Communications Plan: Your family may not be together when disaster strikes, so ***plan how you will contact one another and review what you will do in different situations.*** Consider a plan where each family member calls, or e-mails the same friend or relative in the event of an emergency. It may be easier to make a long-distance phone call than to call across town, so an out-of-state contact may be in a better position to communicate among separated family members. You may have trouble getting through, or the phone system may be down altogether, but be patient.

Create a Plan to "Shelter-in-Place": There are circumstances when staying put and creating a barrier between yourself and potentially contaminated air outside, a process known as "shelter-in-place," can be a matter of survival. ***Choose an interior room or one with as few windows and doors as possible. Consider precutting plastic sheeting to seal windows, doors and air vents.*** Each piece should be several inches larger than the space you want to cover so that you can duct tape it flat against the wall. Label each piece with the location of where it fits.

If you see large amounts of debris in the air, or if local authorities say the air is badly contaminated, you may want to "shelter-in-place." Quickly bring your family and pets inside, lock doors, and close windows, air vents and fireplace dampers. Immediately turn off air conditioning, forced air heating systems, exhaust fans and clothes dryers. Take your emergency supplies and go into the room you have designated. Seal all windows, doors and vents. Watch TV, listen to radio or check the Internet for instructions.

Create a Plan to Get Away: Plan in advance how you will assemble your family and anticipate where you will go. ***Choose several destinations in different directions so you have options in an emergency.*** If you have a car, keep a half tank of gas in it at all times. ***Become familiar with alternate routes as well as other means of transportation out of your area.*** If you do not have a car, plan how you will leave if you have to. ***Take your emergency supply kit*** and lock the door behind you. If you believe the air may be contaminated, drive with your windows and vents closed and keep the air conditioning and heater turned off. Listen to the radio for instructions.

Plans at School and Work: Think about the places where your family spends time: school, work and other places your family frequents. ***Talk to your children's schools and your employer about emergency plans.*** Find out how they will communicate with families during an emergency. If you are an employer, be sure you have an emergency preparedness plan. Review and practice it with your employees. A community working together during an emergency also makes sense. ***Talk to your neighbors about how you can work together.***

STEP THREE: BE INFORMED.

Some of the things you can do to prepare for the unexpected, such as assembling a supply kit and developing a family communications plan, are the same for both a natural or man-made emergency. However there are important differences among potential terrorist threats, such as ***biological, chemical, explosive, nuclear*** and ***radiological***, that will impact the decisions you make and the actions you take.

STEP FOUR: REMAIN CALM.

Be prepared to adapt this information to your personal circumstances and make every effort to follow instructions received from authorities on the scene. Above all, ***stay calm, be patient and think before you act.*** With these simple preparations, you can be ready for the unexpected. If you have a working smoke detector, you understand that preparing makes sense. Get ready now.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

ONLY YOU

Burn Debris Disaster Free

Smokey is counting on you to follow the rules for safely burning debris.
1. Check local laws on burning.
2. Don't burn on dry windy days.
3. Clear a 30-foot circle around debris before lighting fire.
4. Keep shovel, rake and water nearby.
5. Don't leave fire unattended by an adult, even for a minute.
6. Consider alternatives to burning:
composting, recycling, or hauling to a landfill.

REMEMBER, ONLY YOU CAN PREVENT FOREST FIRES.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.
